

## PESIEREE2\_ALLUMINIO

### WEIGHT SET WITH ALUMINIUM CASE AND STAINLESS STEEL WEIGHTS IN E2 CLASS

Weight set with aluminium case, fitted with stainless steel weights in class E2 according to OIML recommendation R111 and suitable for legal metrology and industrial applications. The precision class E2 allows the use of these weights for checking the calibration of scales and instruments in class I up to 500.000e.

Ideal for the verification of weighing instruments in ISO quality regime.

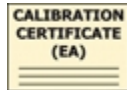

Our solutions for quality  
assurance and certainty  
of your measurements.

## MAIN FEATURES WEIGHTS

- Polished and austenitic stainless steel weights
- E2 precision class
- Compliant with OIML recommendation - R111
- Density 7950 kg/m<sup>3</sup>
- Accredia (EA) calibration certificate upon request
- Initial verification stamp available upon request

## MAIN FEATURES CASE

- Made of aluminum, ideal for use in the pharmaceutical and food industries
- Complete with glove and/or tweezers (tweezers and brush for WSE2M05AL)

## LASER MARKING SERVICE UPON REQUEST:

- The laser marking service is useful to identify each weight or mass individually. More specifically:
    - The marking allows easier identification and traceability of each weight or mass;
    - It is perfectly smooth, does not remove material from the weight and does not affect the surface, thus avoiding dust deposit;
    - It is customisable, according to the requirements of the companies.
- In addition:
- It remains unchanged over time;
  - It can be performed on previously purchased masses and weights, of all accuracy classes, from 10 mg to 20 kg;
  - It is perfect for pharmaceutical industries and laboratories.

### CALIBRATION SERVICE

Below you can see a preview of the calibration certificate. Please pay special attention to point 2. "Required information", data to be communicated to the laboratory when requesting calibration.
